Professional Summary

Motivated Computer Science Engineering student currently pursuing Third Year of B.E. with a strong foundation in programming, databases, frontend development, data analytics, machine learning, and cybersecurity. Passionate about software development, data analytics, and emerging technologies. Experienced in developing web interfaces, machine learning projects, Arduino-based systems, and completing industry-based virtual job simulations.

Education

Bachelor of Engineering (B.E.) in Computer Science and Engineering 2024–2028
Kavayitri Bahinabai Chaudhari North Maharashtra University, Jalgaon
Third Year (T.E.) Computer Engineering CGPA: 7.87

Technical Skills

Programming Languages:	C, Python
Web Technologies:	HTML, CSS, JavaScript
Frontend Development:	Frontend Development, Responsive Web Design
Database:	MySQL
Data Analytics:	Basic Data Analytics using Python, Pandas, NumPy, Matplotlib
Machine Learning:	Machine Learning Fundamentals
Data Structures:	Basic Data Structures and Algorithms (DSA)
Tools:	VS Code, Git/GitHub

Projects

Fake News Detection using Machine Learning

- Developed a machine learning model to classify news articles as real or fake.
- Performed data preprocessing and prepared textual news data for model training.
- Applied machine learning techniques for fake-news classification.
- Evaluated model performance to improve prediction results.

Zomato Frontend Page

- Developed a responsive food-delivery website interface inspired by the Zomato platform.
- Designed the webpage using HTML and CSS with a focus on clean layout and user-friendly navigation.
- Implemented JavaScript functionality to improve interactivity and user experience.

Automated Car Parking System using Arduino Uno

- Developed an automated vehicle parking system using Arduino Uno.
- Integrated sensors and hardware components for vehicle detection.
- Improved parking efficiency through automation and embedded programming.

Job Simulations

GenAI Data Analytics Job Simulation – Forage

- Conducted exploratory data analysis using AI-assisted techniques.
- Identified missing data and recommended preprocessing methods.
- Developed predictive model plans for customer risk assessment.
- Applied GenAI tools to support data-driven decision making.

Deloitte Cyber Security Job Simulation – Forage

- Investigated simulated cybersecurity incidents.
- Identified security vulnerabilities and recommended mitigation strategies.
- Applied cybersecurity best practices for incident response and risk analysis.

Strengths

Quick Learner — Teamwork — Communication Skills — Adaptability
